PROFESSIONAL SUMMARY

Highly analytical Bioinformatics graduate with a strong dual foundation in Computational Biology, Data Science, and Artificial Intelligence. Experienced in Python scripting, deploying machine learning workflows, setting up molecular docking pipelines, and managing complex datasets. Proven ability to evaluate multistep logical problems and build end-to-end data integrations, making me an excellent candidate for advanced remote AI evaluation, LLM training, and technical domain verification roles.

TECHNICAL SKILLS & BIOINFORMATICS EXPERTISE

Programming & Scripting

Python (Advanced/Experienced), R, C, C++
Java, JavaScript, HTML, CSS

Data Science & ML Frameworks

NumPy, Pandas, Matplotlib, Scikit-Learn
Django Framework, API Integration, ETL

Bioinformatics Tools & Databases

CADD: AutoDock Vina, PyMOL, Discovery Studio
Alignments: BLAST, ClustalW, Muscle, MEGA
Databases: NCBI, EMBL-EBI, UniProt, PDB
Methods: Molecular Docking, BioPython

AI AND DATA SCIENCE PROJECTS

Final Year Project: Data Integration Web Application

Django, Python, APIs

- Built a functional web application designed to collect, clean, and combine complex datasets from diverse biological sources.
- Utilized Python, Django, and API integrations to seamlessly connect different backend systems and database structures.

Disease Prediction & Computer Vision Portfolio

AI, ML, Computer Vision

- Disease Prediction System: Built an AI classification system analyzing symptoms to predict health issues.
- Smart Face & Digit Recognition: Designed automated attendance tracking using AI face recognition with optimized pipelines and created Handwritten Digit Recognition neural networks.
- House & Gold Price Prediction: Created regression-based AI models to study economic data trends and predict future asset prices.

Educational Web Platform

HTML, CSS, JavaScript

- Designed and developed a website using frontend technologies to simplify and visualize complex biological concepts for students.

EDUCATION & CERTIFICATIONS

International Islamic University, Islamabad (IIUI) — Islamabad, Pakistan

BS in Bioinformatics (CGPA: 3.49/4.00 | Final Year Project) | 2020 – 2024

IMCG I-8/3 — Islamabad, Pakistan

F.Sc (Pre-Medical) (Grade: B) | 2018 – 2020

IMSG I-10/4 — Islamabad, Pakistan

Matriculation (Grade: A) | 2016 – 2018

National Vocational and Technical Training Commission (NAVTTTC)

Pakistan

- Specialized Certification in Artificial Intelligence (3-Month Intensive at Corvit) — 2024
- Core Focus: Machine learning, exploratory data analysis, deep neural networks, and computer vision training.

LANGUAGES

English: Fluent (Professional alignment and documentation) • Urdu: Native
